ve also been told that some office supply stores will refill this kind of cartridge for much cheaper than i could buy new ones i have **n't** tried that yet , since we still have **plenty** of ink , but i ll **update** \ (or **feel free** to **chime** in if you **know** if that **works** in this **case** \) **overall** , so far i really like this **machine** at this **point** , i d **definitely recommend** it if you do **n't** mind the **expensive ink maybe** it **last longer** \ ? it s very **smart** ! i ve only had it a few **weeks** , **though** , and as we all **know** that s not **long enough** to **make** a **great** **decision** when a **printer** is **involved** i ll **try** my **best** to **update** as i ve **used** more **features** and **get** to **know** how **well** the **machine** will **actually hold up** **wireless printer**

i was **way overdue** to **start cleaning**
my **basement** but **needed** some **good**
sturdy boxes to **label** and **store** items these
boxes are **designated** for **pictures** and **mirrors**
and i **used** a few of them for some of my **pictures** but
i **also used** them for other **items** in my
basement for **storage** they were just what i
needed strong and **easy** to **put together**
and **label** good product ! very **durable** !

attention score: 0.13027659

they are **durable like stated** on **package** but
they were **hard** to **write** on them and a
smearing problem also i was **excited**
seeing these i **thought** i **could redo**
my **files** but more **work** than it was **worth**
skip ! dont make the **cut !**
