ve also been told that some office supply stores will refill this kind of cartridge for much cheaper than i could buy new ones i have **n't** tried that yet , since we still have **plenty** of **ink** , but i ll **update** \ ( or **feel free** to **chime** in if you **know** if that works in this **case** \ ) **overall** , so far i really like this **machine** at this **point** , i d **definitely recommend** it if you do **n't** mind the **expensive ink maybe** it **last longer** \ ? it s very **smart** ! i ve only had it a few weeks , though , and as we all **know** that s not **long enough** to make a **great decision** when a **printer** is **involved** i ll try my **best** to **update** as i ve **used** more **features** and **get** to **know** how **well** the **machine** will **actually hold** up **wireless printer**
