save your **money** , this **game** is a **joke**
should **n't** even be **called** a **gears of war**
game lol seriously do **n't** buy this ,
stop putting up with **garbage games**
from **companies** that **want** to **release new**
games every year what did they do to this
game \ ?

attention score: 0.20849402

this **game** is **like** the **expansion pack** they **released** for gears2 , it s not a **full game** the **multiplayer went towards halo** and **cod** so **basically everything** you **loved** about **gears** is **gone** best of all no **horde mode** , **beast mode changed** to **overrun** and **sucks** do **n't waste** your **money** on this **money grab** i should of **known better** when **people** can **fly** was the **developer** , this is not an **epic game** it **simply uses epic** as the **publisher** and **ruins gears** for **fans** no **horde**

attention score: 0.14835173

horrible ! **gears** of **war** was on a down **hill**
slope after the **first game release** do **n't**
understand how you can **make** an **awesome**
game worse and **worse** but **people**
can **fly** definitely **proved** you can **ruined** the
gears of **war** franchise for me and i
honestly will **never buy** another **gears**
do **n't waste** your **money !**

attention score: 0.19867998

as ever , but the **lack** of **maps** may bore players quicker than previous games overall , **judgement** is a huge disappointment the campaign is generic , short , and **almost boring** , the **tactical side** of **gears** is **taken away** for **running** and **gunning multiplayer suffers** from a **lack** of **maps** , but at **least** there s a **lot** of **customization stuff** to **unlock** for your **characters** you now **get rewarded** for all those **kills** and **ribbons** you **earn** in the from of prizeboxes the **graphics look great** and **push** the 360 to its **limits** , but the **console** is **seriously aged** and it **shows judgement** is **fun weekend rental** or **bargain purchase** , at this **point gears of war** needs a **reboot** to **keep** from **going** under **took away** what **made gears gears** **barely worth** a **weekend rental**

attention score: 0.17732102

used to be a **big** gears fan , and have **played** the **last couple** games purely for **horde mode** despite the **fact** that i **recently** read an article stating **horde mode** was **going** to be **bigger** and **better** than **ever** , they **took** it out **completely** ! ! i **played** the **game** for a **couple hours** but am **done** with it , and the **franchise** this **game** offers **nothing** compared to **mass effect 3** **multi player** , which is a **year old** and **still** **going** strong they **blew** it

attention score: 0.18529198

the **os** is a **complete mess** the **360** is **better** in that **aspect** **kinect still sucks** and there are **0 games** for it i **hate** that you **ca n't auto login** without kinect great job taking away a feature that the **360** had all **third party games run better** on the **ps4** i played the **titan fall beta** and it s **way overrated** it s average at best i would **return** the **system** if my **return date** had **n't passed** i home ms sells the **xbox division** to a **company** that **cares** about **gaming disappointed**

attention score: 0.15740488

i was as **skeptical** as **everyone else** , but **kinect** won me over it **works** and it s **fun** it s **really** **amazing technology** you do **need** at **least** 6ft do **n't take** this as a **suggestion** it is a **requirement** my **review** is in **regards** to **using** it to **play games** the **dashboard stuff** is **ok** but i do **n't use** it for that **kinect rocks !**

attention score: 0.18009351

the frame rate **also** is n't great and many people are experiencing **game** breaking lag gameplay wise i thought having grenades be weak **would** be a **good** idea but in practice it **makes** it **impossible** to **clear** out **groups near objectives** which leads to a **lot** of stalemates i **also think** the **game** **would play better** with **fewer players** more does not **almost equal** more **fun finally** for a **full priced mp only game** to **ship** with only **8 maps** is **ridiculous luckily** i **rented** this **game first** so it s **heading back** to the **rental service** i **use** if you **want** a **good mp only game** on **360** you can **take** a **look** at **section 8 prejudice \ (15 \)** on **ps3** i **would suggest** **killzone 3** **sigh** **another homefront**

attention score: 0.1583538

the only **reason** to **buy** this is for the **co op**
which they **still** have **n't delivered mp** is
dead by the **time** this **comes** out , no **one** will be
left to **play** it with **game came** out in
november and the **co op** is **still** mia

attention score: 0.14403008

racer couple this with the fact that you have to place first in order to progress and you end up with a

game that is neither **fun** nor **accessible** , it s just frustrating the issues do n't end there though even if you only want to **play multi player** you will be **frustrated** by **incredibly long load times sometimes** the **load** is **longer** than the **actual race !** the **developer promised** to **fix** this but **2 months post release** and not a **single patch** has been **released** for the **game finally** the **cart handling** is just too **sensitive** you will **find** yourself **frequently** over **steering** and **bouncing** into **walls** because of the **controls** **eventually** you **may adjust** to them but it **still** is not **fun** to **drive** in this **game** this **game could** have been **brilliant** but the **developer spent** too **much time** focusing on the **creation tools** and not **enough time** on the **core game play** skip this **game** not **accessible** nor **fun**

this is a **bad game** the **graphics** are **barely 360 level** the **controls feel sloppy** the **ai** is **horrible** and the **mission design** is **dreadful** and that's just the **single player** the **multi player** promises **large scale battles** but they **come** off as **small scale sniper fests** i 'm so **glad** i did **n't buy** into their **hype** and **rented** this **first** now i **know** why they did **n't release** a **demo** **stay far away** from this you can **read** my other **reviews** and **see** that i 'm generally very **easy** on **games** that other **people** do **n't like** , but this **one** has no **redeeming qualities** one the **worst games** of this **console generation**

as ever , but the **lack** of **maps** may bore players quicker than previous games overall , **judgement** is a huge disappointment the campaign is generic , short , and **almost boring** , the **tactical side** of **gears** is **taken away** for **running** and **gunning multiplayer suffers** from a **lack** of **maps** , but at **least** there s a **lot** of **customization** stuff to **unlock** for your **characters** you now **get rewarded** for all those **kills** and **ribbons** you **earn** in the form of prizeboxes the **graphics** look great and **push** the 360 to its **limits** , but the **console** is **seriously aged** and it **shows judgement** is **fun weekend rental** or **bargain purchase** , at this **point** **gears of war** needs a **reboot** to **keep** from **going** under **took away** what made **gears** **gears** **barely worth** a **weekend rental**
